

Steeton Primary School

KSI

Summer 1 - Sustainability - Reduce, Reuse, Recycle

Topic

Our topic next half term will be all about sustainability and specifically the three R's – Reduce, Reuse, Recycle. Children will be trying to answer the Big Idea “Where does our rubbish go?” They will learn about the affect our waste has on the environment and how to help the planet by reducing our waste. They will reuse waste by turning it into different items that can be used again. We will be sorting waste into types that can be used again/recycled and those that end up in landfill.

Children will also learn about the oceans and how our waste can affect the animals that live there.

Magic Monday

Next half term there will be a focus on Design Technology in our Magic Monday sessions. Our theme will be sensational salads. Children will design, make and compare different types of salad. They will be talking about their likes and dislikes and how they could improve on their creations. Children will be working on lots of different skills such as cutting, grating, peeling and chopping.

English / Reading

In the Summer term we will continue the same format with reading—children will bring home a book bag book on a Monday and a phonics book on a Friday. Please read these with your children at home. Phonic knowledge has been reassessed and all children will continue to receive a daily 45 minute phonics session appropriate to their ability.

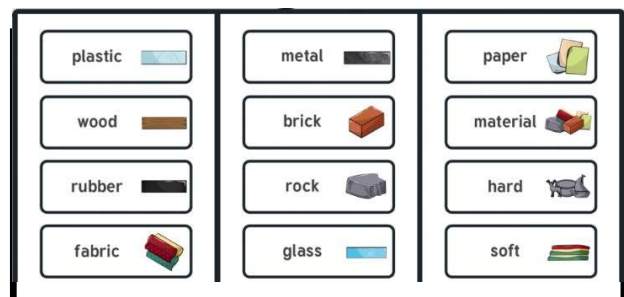

Children may also bring home reading books from their class libraries. These may not necessarily be at their reading level but are books to enjoy with you. If you have any reading books at home please send them in so we can re stock our class libraries.

Oak class will be continuing to build on their independent writing during their drawing club lessons. Maple and Willow classes will continue to work on their grammar, punctuation and creative texts in their Writing for Pleasure lessons.

Handwriting lessons have started across school and children are enjoying learning about water/sun/boat letters (ask your child to explain!)

Science

Our first week back will be a science week. Children will be learning about different materials. They will find out about the different types of material (wood, rock, glass, metal, fabric etc). Children will be learning the difference between the name of an object and the material it is made from. They will be thinking about the properties of different materials (soft, smooth, rigid, flexible, waterproof etc) and sorting materials based on those attributes.

Pupil Offer / Dates for Your Diary

School closed for Eid—Wednesday 10th April.

Year 1 phonic screening test— 10th-14th June.

Other Information

Please see the PE timetable below for the dates children should come to school in their PE kits.
