Summer 1

Magic Monday Waterfall Cards

We will design, make and test a waterfall card. This is a card with a sliding mechanism (scan QR code for an example). Children will include information on a sustainable theme to link in with our History and Geography topic. We will also using recyclable materials for our card.

History and Geography Sustainability

We will take a deep dive into conservation and study the top ten countries who promote conservation. We will study the different classifications of animals and their differing habitats. We will study threats to their habitats and how humans can minimise these.

English

Mrs Foulds and Mrs King have lots of exciting Curious Quest writing planned for Fir class.

In Rowan and Elder we will be focusing on incorporating fronted adverbials into our writing. We have bought new books for this topic and we can't wait to get reading them!

Science

States of Matter

Compare and group materials together, according to whether they are solids, liquids or gases.

Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius ($^{\circ}\text{C}$).

Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

Dates For Your Diary

22.4.26
Maths Challenge
1.5.26
Ponderosa Zoo
21.5.26
Party in the Park
